UNITED STATES DEPARTMENT OF AGRICULTURE

Soil Conservation Service
H. H. Bennett, Chief.

DIRECTORY OF FIELD ACTIVITIES
OF THE
SOIL CONSERVATION SERVICE

Department of Agriculture
Washington, D. C.

Prepared and issued by
Division of Personnel Management
October 1, 1939.

The Directory of Field Activities is being issued for the purpose of systematically listing the location of each separate field activity for which the Soil Conservation Service is held responsible and where we have employees working.

In order to make it clear in what manner this Directory has been compiled the following information is given:

1. As far as possible an effort has been made to have the Directory include only facts which are supported by the official records of the Service. For example, the Directory shows no person in charge of an office who has not been officially approved or administratively designated to fill that position.
2. This Directory does not list those headquarters at which the Soil Conservation Service is represented only by an unpaid agent or collaborator.
3. WPA Projects and Water Facilities Projects have not been included in this Directory. This information will be supplied at a later date in the form of a supplement.

Because it is comparatively new, it is recognized that this Directory is not perfect. Suggestions for its correction or improvement will be welcome.

Supplements listing changes to be made in this Directory will be issued as often as necessary.

For a more complete listing of the Regional Office Staff, refer to the "Directory of Organization and Field Activities of the Department of Agriculture," Misc. Pub. #304.

For separate listings of soil conservation districts, demonstration projects, etc., refer to the blue-covered Soil Conservation Service Directory issued by the Information Division.

REGION ONE

TYPE OF OFFICE	DESIGNATION	ADMINISTRATIVELY ATTACHED TO	HEADQUARTERS	OFFICIAL IN CHARGE AT HEADQUARTERS	WORKING TITLE
